

**Advanced Java Laboratory (CSL56)**

**USN: Week #: 08 Semester: Section: Date:**

**Instructions:**

- **Implement the following programs using java language.**

**Programs:**

1. Write a JSP program to connect to the database and display the following details. The Employee table has ID, FName, LName, Project and Salary.
  - User should be able to display the details using any fields.
  
2. Write a JSP program to demonstrate the JSP Implicit Objects by using a Login Page. Assume the username and password as “Admin” and “Admin123”. Display proper error message using Exception Implicit object when username and password does not match.
  
3. Write a JSP program to store 3 cookies with different attributes and extract the cookies using another JSP program.
